Get DataTables

Download
Purchase

The best method for getting a hold of DataTables for use in your project depends upon your programming environment. The download builder below provides a simple method that you can use to build your own custom DataTables package - including only the software that you need, and providing options to have it hosted on the DataTables CDN, download the package locally or install through a package manager such as *npm*, *yarn* or *bower*.

Compatibility

A detailed compatibility table shows the browser's that DataTables supports and also which features of the extensions can be used with the other extensions. A few features may not always be fully compatible with every other aspect of the software (due to overlapping functionality), so please take the time to review this table.

Step 1. Choose a styling framework

○	**DataTables**	DataTables' default styling.	v1.13.4
○	**Bootstrap 3**	Legacy version of Bootstrap - useful if you need to support old browsers.	v3.3.7
○	**Bootstrap 4**	v4 of possibly the world's most widely used styling library.	v4.6.0
✓	**Bootstrap 5**	The latest iteration of the ever popular Bootstrap framework.	v5.1.3
○	**Bulma**	Modern CSS framework based on Flexbox	v0.9.2
○	**Foundation**	A modern responsive styling framework.	v6.4.3
○	**jQuery UI**	A collection of Javascript widgets as well as a styling framework.	v1.13.2

already have it.

○ **jQuery 1**	Use for compatibility with older browsers. jQuery 3 requires IE9+.	v1.12.4
☑ **Bootstrap 5**	Don't select if you already have Bootstrap 5 on your page.	
☑ **DataTables**	Enhance HTML tables with advanced interaction controls.	v1.13.4
○ **Editor**	Add full editing controls to your DataTables. Editor is a commercial extension for DataTables, it requires a license to use it for longer than the free trial period. Please create an account or login to be able to include Editor in the package.	v2.1.3

Extensions

○ **AutoFill**	Excel-like click and drag copying and filling of data.	v2.5.3
☑ **Buttons**	A common framework for user interaction buttons.	v2.3.6
☑ Column visibility	End user buttons to control column visibility.	v2.3.6
☑ HTML5 export	Copy to clipboard and create Excel, PDF and CSV files from the table's data.	v2.3.6
☑ JSZip	Required for the Excel HTML5 export button.	v2.5.0
☑ pdfmake	Required for the PDF HTML5 export button.	v0.2.7
☑ Print view	Button that will display a printable view of the table.	v2.3.6
○ **ColReorder**	Click-and-drag column reordering.	v1.6.2
☑ **DateTime**	Date picker used in Editor, SearchBuilder and other components for DataTables.	v1.4.1
○ **FixedColumns**	Fix one or more columns to the left or right of a scrolling table.	v4.2.2
○ **FixedHeader**	Sticky header and / or footer for the table.	v3.3.2
○ **KeyTable**	Keyboard navigation of cells in a table, just like a spreadsheet.	v2.9.0
☑ **Responsive**	Dynamically show and hide columns based on the browser	v2.4.1

size.

RowGroup	Show similar data grouped together by a custom data point.	v1.3.1
RowReorder	Click-and-drag reordering of rows.	v1.3.3
Scroller	Virtual rendering of a scrolling table for large data sets.	v2.1.1
SearchBuilder	User defined complex search builder.	v1.4.2
SearchPanes	Search panels for DataTables allowing rapid and customisable filtering.	v2.1.2
Select	Adds row, column and cell selection abilities to a table.	v1.6.2
StateRestore	Save and restore DataTables states.	v1.2.2

Step 3. Pick a download method

CDN | Download | NPM | Yarn | Bower | NuGet | Composer

The DataTables CDN provides a convenient way to quickly get started with DataTables. The DataTables software is hosted on the CDN (powered by CloudFlare) and you simply need to include the HTML and CSS files as directed below.

Minify	Use minified files for smaller files sizes and faster downloads.
Concatenate	Combine files together for a, typically, faster download.
